

Registration & Consignment notes

EA Registration

This registration is generated from the EA (Environmental Agency). The code is produced with 3 letters and 3 numbers. The cost is £40.00 and this will cover you for one year.

Each premise has to be registered with the EA for collection or transportation of Haz-waste. If this is not generated you will not be able to produce a consignment note.

Consignment note

This is a form which is needed to be filled out when the haz-waste is collected. The cost for this is £30.00 each load.

Why they want this!

The EA request the above as it is there way to follow what is being disposed of. We have an obligation to provide the EA with the details of the Haz-waste every quarter.

However, this is a completely different quarterly report to the Compliance reporting.

What I can do

I know this can seem a bit overwhelming but there is no need to panic. I can offer the service to do all of the consignment notes and registration for you.

If needed I can also book transport for you. After disposal we provide a **certificate of conformity** which is produced for you so you can prove where you have disposed your equipment.

If you bring your own Vehicle!

Please remember to let me know when you plan to bring down your equipment so I can complete your consignment note, Fax/Post it to you or the driver. This also helps with unloading time as I can then add you onto the booking in board and we will expect you.
